

## Automate Your Workflow

At Savini Consulting LLC, we have developed a Research Portfolio Management element to our A-PRAISE system to easily obtain/manage portfolio data and provide targeted communication to PIs to adapt to changing regulations. The Research Portfolio Management element:

- Gathers “real-time” study status updates from PIs
- Creates an actionable data base of studies for targeted communication and tracking
- Uses automated reminders for follow-up
- Offers comprehensive reports on study status, funders/sponsors, regulatory oversight, and other key study information to make informed decisions by the push of a button.

Use the QR code or our [ONLINE FORM](#) to request a demo today!

The Research Portfolio Management element is customizable and useful in ANY research climate.

## Let Us Help You

Savini Consulting is also ready to assist you with temporary staffing and expertise to conduct the additional work required to meet institutional requirements to fulfill any executive orders. We also offer resource development. Need guidance on transitioning participants from research to clinical care? We can do that! Need assistance adapting the new orders or regulations? We can do that! We are here for any of your research compliance needs.

*These helpful tips should not be used solely to determine how to appropriately pause your study. Consult with the relevant offices at your institution.*
